Inference review

There are four figures above. Use them to answer the following questions.

Label a *null distribution* with an asterisk. Label a *sampling distribution* with a triangle.

Which two figures represent a *null hypothesis test*?

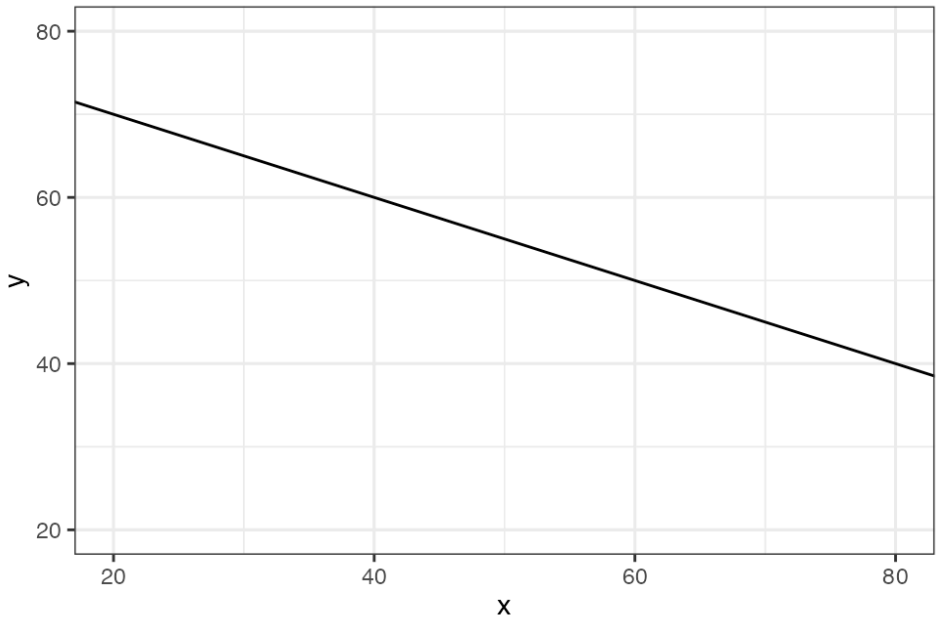

In these figures, what do the *shaded regions* represent?

Which two figures were produced using a *randomization-based procedure*?

Name the randomization-based procedure underlying each of the two figures.

Correct the error in the following statement: "The p-value is the probability that the null hypothesis is true."

Linear equations

What is the equation of the line in the figure above?

In the following figure, draw the line:

y = 0.1x + 0.5
